Working with "Big Data"
Google Analytics
Google Tag Manager
MongoDB
Postgres SQL
Node.js
React.js
Angular.js
Redis Cache

Work Experience

Senior Adobe Commerce Cloud Developer

Primo Brands (water.com)

November 2022 – Present

Primo Brands Corporation is a leading branded beverage company in North America, focused on the large and fast-growing healthy hydration sector with over 1 billion in annual sales. Here I am overseeing the development of their new water.com website powered by Adobe Commerce Cloud, as well as maintaining their existing website at drink.water.com. Other duties include optimizing product data and distributing the data to various sales channels. I have created their Google Merchant feed and developed the store locator functionality. This project entailed connecting Magento storefront to Salesforce through a custom API to list their 38,000+ locations in real-time based off the end user's location.

Full Stack Web Developer

ICM Corporation - Milwaukee, Wisconsin

October 2011 - November 2022

ICM operates around 60 websites, mainly E-commerce or B2B based. These websites are hosted on multiple different servers and operating systems. My strongest area of expertise is Linux (Ubuntu/Debian or RedHat/CentOS) and PHP. Working here I gained 11+ years of experience working with Magento 1.x.x and 2.x.x, PHP, Javascript, CSS, HTML5, MySQL, jQuery, Elasticsearch, Redis, Nginx, Apache, Node.js, React.js, Amazon AWS, Git, Jenkins, Kubernetes, Odoo, Akeneo, developing custom scripts to connect various APIs from 3rd party systems to their "In House" systems.
